## The Vision

*“Bringing the soul and results back to organisations across the world.”*

## The Mission

*“Educating 333 million people across the world on leadership.”*

## Our Values

<i>Excellence...</i>	is at the core of everything we do.
<i>People...</i>	are at the heart of everything we do.
<i>Passion...</i>	is the fire that drives the results in everything we do.
<i>Partnership...</i>	is the collaboration behind everything we do.

## The Benefits of using the Corporate Soul Team

We will assist you in improving your culture to become a higher performance company.

We will help you clarify and simplify the organisation's vision and strategy.

We have a proven track record of helping leaders and teams turn their performance around.

We use practical strategies and systems that can be implemented quickly.

## Consultancy Approach

In our consultancy we will not simply complete a project, submit a report and walk away; ***we will help your people learn from what we do***, so they can learn to do it themselves next time. This will eliminate dependence and reduce the need for further consultancy.

We will find out what improvements you are looking for. We will then agree what needs to be done and separate the resulting stages, each of which will have a measurable outcome.

***Everything we do for you will be a duty of care.***
